REDUCE COSTS.
MINIMIZE RISK.
OPTIMIZE RESULTS.

STAY ON TOP OF EVEN THE MOST COMPLEX PROJECT WITH OUR COMPREHENSIVE APPROACH TO CONSTRUCTION SCHEDULING.
LETTER FROM THE PRESIDENT

To say that a CPM schedule is a critical tool for any job site would be a gross misrepresentation. It is the solid ground that must form the foundation of your building, investment, and livelihood. It is the precursor to every positive outcome. But at HSE we don’t settle for mere success; we are unrelenting in our pursuit of fully-optimized build plans.

Our CPM scheduling consultants take on some of the most challenging construction projects from across the country – from the new World Trade Center Memorial in New York City to the LAX airport in Los Angeles. Our team of experts has experience in developing and managing CPM construction schedules that encompass more than $10 billion of critical resources and activities. We develop, maintain, and manage CPM schedules, offer risk analysis, safety control, earned value analysis, 4D and BIM modeling, and more.

But more important than what we do, is what we offer and that is: excellence.

Don’t roll the dice with your resources. Don’t accept anything less than excellence. Work with the best construction project management team available to you and watch your business flourish as a result.

My team and I look forward to working with you,

Hany Elbanna
The HSE team is composed of construction managers, engineers, schedulers, and claim consultants, all of whom offer extensive field experience as well as CPM Scheduling expertise. For the better part of two decades we have provided effective project management solutions to a wide variety of public and private clients, and have become one of the fastest-growing scheduling and project management corporations in the United States.

Even though we work in a sweeping range of construction industry segments, our commitment to providing excellence in developing, managing, and analyzing project schedules is a constant. HSE is founded on the belief that success is derived from a strong work ethic and unwavering reliability, and our objective is to add value to every project we take on. By combining our critical path and software expertise with your knowledge of the project, HSE Contractors will build a comprehensive and reliable schedule that enables project management to proactively develop your project and professionally communicate status reports to the client throughout the project’s development.

If you are interested in creating an optimized construction schedule or speaking with one of our construction scheduling engineers, please contact us to get started today.

For your protection, HSE contractors is insured up to $4,000,000 by general liability & workers comp.
CPM Scheduling Services: Plan your project from start to finish by strategically allocating resources and anticipating complications before they occur. Our professional schedulers will provide the roadmap to keep your project on time and under budget.

- Critical Path Method (CPM) Scheduling
- Program Management Schedules & Periodic Updates
- Project Acceleration & Delay Analysis
- Critical Chain Method analysis
(and more)

Construction Scheduling Training: Educate your team with in-house, online, or multi-day trainings on a variety of engineering and construction-related topics. Acquire an array of tools that can be immediately integrated into your management repertoire.

- Primavera Software
- Suretrack Software
- CPM Scheduling & Delay
- Preconstruction Estimating & Budgeting
(and more)

Construction Estimating: Receive detailed quantity takeoffs and pricing from a construction project’s conception phase to closeout as part of our construction estimating services. We’ll also identify and analyze the project’s scope, time, cost, quality, and performance to provide an accurate assessment as the project develops.

- Conceptual Project Bids
- Contract Cost Review
- Value Engineering Cost Estimates
- Change Order Evaluations
(and more)

Construction Claims: Should a construction claim occur, the HSE experts will help promote a successful resolution by working with you through each step to identify, analyze, and present construction claims on your construction and engineering projects.

- Claims Identification
- Claims Mitigation & Avoidance
- Claims Preparation & Presentation
- Construction Mediation, Litigation, & Arbitration Support
(and more)

BIM & 4D Modeling: Visualize your project with the latest technology in modeling and design. We supply our clients and their stakeholders with a comprehensive model of the project at hand, using a range of modeling services and software.

- 5D BIM Modeling
- 3D Modeling
- 4D Model Simulation
(and more)

Type of Work: K-12 Education and School Projects
WHAT OUR CLIENTS SAY

“Hany, your team did an excellent job working with our staff to develop our schedule. If the need arises again in the future you will be the first one we call.”

SKANSKA

“Working with HSE was a great experience, a very professional and knowledgeable staff was provided and the confidence and quality in the deliverable was very high. You guys did an excellent job. Thank you again for your services.”

Kiewit

“HSE is very responsive and willing to do whatever it takes to deliver the desired product to their client. I’ve found their management to be very talented, as well as genuinely interested in the success of my project.”

PCL CONSTRUCTION

“HSE has worked hard in a short period of time to map out the sequence of work to all stakeholders and highlighted major issues that would have otherwise gone unnoticed. Thanks to HSE, we have a clear vision of how to resolve these problems.”

US Army Corps of Engineers.

“HSE has done a fine job and we won’t be here without you.”
